

Keeping a Cruise Liner cleaner with BIOPROTECT™

The BIOPROTECTUS™ System for Cruise Ships

Added Assurance for a Cleaner Clean for Your Passengers

Cruise Ships can be breeding grounds for germs and common touch point surfaces such as; elevator buttons, stairwell railings, food surface areas, pool deck chairs as well as restrooms and passenger cabin spaces. With prevention being the best treatment, adopting the BIOPROTECTUS™ System into a ship's cleaning process can help protect your passengers, your crew members, your reputation and your fleet investment.

What is the BIOPROTECTUS™ system?

The BIOPROTECTUS™ system includes an array of patented, EPA registered technologies to modify surfaces, providing such surfaces with disinfection and durable long term antimicrobial protection that kills and inhibits the growth of problematic bacteria, fungi, algae, protozoans, viruses and other microorganisms that can exist in many of life's surfaces. In addition, the BIOPROTECTUS™ System offers hand and skin purifiers, laundry treatments and air purifying filters.

Where can the BIOPROTECTUS™ system be used?

The BIOPROTECTUS™ system can be used on a full range of surfaces within a cruise ship's interior environment to render those surfaces cleaner, safer and healthier, enabling any Cruise Line company to more confidently manage and control contamination without negatively affecting passengers and employees, the environment and the areas being treated.

How are the BIOPROTECTUS™ system of products applied?

The BIOPROTECTUS™ system of products are applied by simply fogging or misting using an electrostatic or ULV sprayer. No wipe or rinse required. Simply fog or spray and allow to dry.

Adopting the BIOPROTECTUS™ system into your fleet's cleaning protocol will set you apart as the industry leader in cruise line hygiene
